Here is the public announcement, formatted as requested, from the perspective of the AEIA BardiVarius/Thomas team:

PUBLIC ANNOUNCEMENT

FOR IMMEDIATE RELEASE

AEIA BardiVarius/Thomas Announces Start of Principal Scouting and PromptCasting for the Deep Dive Feature: "The Zombie FishNets of Kaua'i"

HANAPEPE, HI – October 8, 2025 – The Authenticated Ethical Integrity Agency (AEIA) BardiVarius/Thomas today announced a major step forward for its upcoming 5D5G5L AenimAition Deep Dive Feature, *"The Zombie FishNets of Kaua'i."*

Following the successful conclusion of the PeacePreneuring Incubator Challenge Virtual Workshop, the project team will commence principal location scouting and PromptCasting activities across key coastal and community areas of the Garden Isle.

The initiative, which interprets the "Ghost Net" invasion of Kaua'i as a compelling Science Faction EcoDrama AEnimAition (tm), will focus

its initial efforts on the following major elements and communities:

- **Anahola (East Side/Ko'olau): Known for its deep cultural roots and Hawaiian Homestead communities, which provide a vital context for the narrative's themes of land and ocean stewardship.**
- **Hanalei (North Shore/Halele'a): A region renowned for its breathtaking beauty, historic pier, and taro fields, setting a stunning contrast for the "Zombie Fishnets" threat.**
- **Kapa'a (East Side/Coconut Coast): A central and vibrant hub that will serve as a crucial backdrop for community mobilization and cooperative problem-solving efforts.**

The integration of these distinct geographic and cultural locations is central to the project's 5D5G5L mandate, ensuring the animation reflects authentic environmental and community layers (5L) while driving global awareness (5G) of this climate conundrum.

The final AEnimAition Deep Dive Feature will follow the prequel narrative, updates for which are released on the 8th of each subsequent month, available via a one-time investment subscription.
